

Internal Brief: Numinous XR System Overview

Routing Summary for Debbie / Lux Capital Admin Team

Hi team,

This is a backgrounder on Numinous - a real-time telemetry and motion capture system developed by Koala Tea Eye Candy LLC.

- Patent-pending
- For-profit + nonprofit dual model
- Grant support in progress from Solana

The system brings real-world movement (drones, vehicles, animals, humans) into Unreal Engine environments in real time.

Peter and Josh received direct messages. This doc supports internal routing if the team decides to review further.

Thanks for your time,

Kurt Otte
