

Numinous: Built to Outlast the Noise

Founder-to-Founder Snapshot for Josh Wolfe - Co-Founder, Lux Capital

I soldered the boards myself. I own the land. The system works.

Numinous is a hybrid telemetry and motion system that maps real-world data from drones, animals, vehicles, and humans into Unreal Engine XR environments.

- Patent filed
- 5-acre field lab, no debt
- Unreal-ready pipeline for simulation, licensing, and digital twins

Solana is reviewing our open-source civic layer. We're building the infrastructure, not chasing hype.

This is proof-of-work at the hardware level. And it's ready to grow.
