Mission Create develop and deliver integrated cutting edge "Utility's" for a grateful future.

Executive Summary

Koala Tea Eye Candy LLC is a veteran-owned, family-operated experimental media and motion research company grounded in real estate-backed capital and multi-disciplinary field experience. Eastern Washington affords a rich operational environment of varying topographies, cultures, and an array of unique domestic infrastructural features that will help promote, develop, and deploy, AR/XR/VR Digital Twinning, Interactive Real Estate Virtualization, animal-human hybrid motion capture systems, drone integration tools, and cutting edge media prototypes.

Our mission is to revolutionize the interface between the Virtual and the Real through

Objectives

Q1 2025 (Immediate Focus):

- Begin commercial operations with real estate photography and photogrammetry services
- Acquire and integrate Matterport SDK licensing for Unreal Engine compatibility
- Establish initial partner pathways with Matterport for digital asset streaming
- Emphasize minimal overhead due to in-house ownership, talent, and technical capability

Short-Term (1-3 years):

- Complete acquisition of 5-acre property
- Build motion-capture infrastructure for drone, animal, and human integration
- Expand Unreal Engine capabilities for importing real estate scans
- Reach \$100,000 in revenue with high-margin low-cost field capture services

Long-Term (3-5 years):

- Develop and publish a proprietary digital clone asset library
- Grow equity to \$300,000+ through land, IP, and licensed digital assets
- Implement dynamic virtual object compendium for XR, VR, simulation, and tactical training/gaming simulation
-
- License fully scanned, ported, and rendered properties for environment design and urban

Unique Selling Proposition

Koala Tea Eye Candy LLC is a full-spectrum motion and integration lab operating at the crossroads of biomechanics, animal behavior, drone autonomy, and immersive content. Our edge:

- Proprietary 5-acre testbed and studio site
- In-house veteran founder with creative and technical firepower
- Minimal overhead, high flexibility
- Early adoption of photogrammetry-to-engine pipeline with Unreal Engine and Matterport

Case Studies / Use Scenarios

- Real Estate/Architecture: Fully scannable and destructible interior models for XR planning and simulation
- Simulation & Training: High Fidelity Photorealistic environment replication with drone-based overlay updater
- Entertainment & Gaming: Drop-in home models with destructible furniture assets and vertical traversal points

Facility & Infrastructure

- Outdoor drone flight grid and telemetry perimeter
- Indoor modular capture bay with XR and photogrammetry-ready lighting
- Animal/human hybrid zone with scaffolded motion paths

- Unreal Engine development lab with dedicated Matterport integration system

Regulatory Considerations

- FAA Part 107 drone compliance
- Local zoning approved for commercial and technical development
- Minimal operational footprint (owned site, no lease dependencies)
- Compliance with privacy and digital rights under Matterport SDK and photogrammetry TOS

Financial Highlights (Modest Projections)

Year 1: Revenue: \$100,000 | Net Profit: \$10,000

Year 2: Revenue: \$250,000 | Net Profit: \$45,000

Year 3: Revenue: \$500,000 | Net Profit: \$110,000

Assets: Established Cumulative subscriptions \$750+, \$22,000 hardware components and studio equipment, \$20,000 liquid cash, \$200,000+ deeded property (County Assessors current projected value; asset encroachment via urban expansion will reflect dramatic valuation) And a pocket full of possibility.

Products & Services

- Real Estate Photogrammetry: Scan-to-asset for engine compatibility
- Hybrid Motion Capture: Multi-species synchronized tracking systems
- Drone Augmentation: Assistive flight behavior mapping and performance capture
- Digital Asset Library: Destructible virtual interior furnishings and environments
- Unreal Integration: Optimization, porting, and asset prep for XR, VR, and sim platforms

Marketing Strategy

- Online: Video scans, Unreal demo walkthroughs, and hybrid testing reels
- Offline: Field demonstrations for realtors, developers, and tactical trainers
- Sales Flow: Service delivery -> Asset drop -> Licensing/hosting -> Partner expansion

SWOT Analysis

Strengths:

- Property-secured foundation
- Retired veteran founder with financial runway and vision
- Cross-sector potential in entertainment, architecture, and simulation

Weaknesses:

- Licensing negotiations (Matterport SDK) are competitive
- Hybrid use-case needs data and client education

Opportunities:

- Unreal Engine asset growth and digital twin markets
- Growth in autonomous space planning and XR real estate demos
- Digital asset resale potential for destructible virtual property packs

Threats:

- Licensing limitations and data restrictions
- Market saturation in traditional real estate media
- Regulatory shifts in drone capture and data usage

Organization Structure

Founder (1 Acre Staked): Kurt Otte Creative Director / Strategic Lead

Co-Owners (1 Acre Staked each): Joshua Otte, Zachary Otte, (technical, legal, operations roles)

Advisors: [To be added drone regulation, photogrammetry IP law, animal integration, asset rights]

Milestones

- Q2 2025: Begin real estate photogrammetry + Matterport SDK integration
- Q3 2025: Launch Unreal Engine asset pipeline for scanned homes and commercial construction sites
- Q4 2025: Begin prototyping destructible virtual interior pack
- 2026/2027: Build full digital compendium of scan-to-XR anonymous real estate assets***
- Beyond.....Applications for Homeland Security, Decentralized IoT (EverEye, 4th Wall overwatch), Customized Solutions for rapid advancement.

Closing

Koala Tea Eye Candy LLC is the evolution of tactile tech and artistic vision. This is the plan for a real-world studio led by someone who doesn't just dream it. He builds it, wires it, renders it, straps it to a drone guided dog, and deliver next edge immersion. We're not a startup. We're a loaded launcher aimed straight at the next layer of digital reality. KTEC "Quality Assets that change the game"

NOTE: Financials and projections subject to technical deployment, licensing pathways, and partner integration timelines.
