

# Numinous: Patent-Protected XR Infrastructure

Strategic Overview for Peter Hebert - General Partner, Lux Capital

Numinous is a real-time telemetry and hybrid motion capture system developed by Koala Tea Eye Candy LLC.

- Patent-pending system built for immersive XR environments using Unreal Engine
- Integrates drones, vehicles, animals, and human telemetry into live digital twins
- Operating from a 5-acre testbed in Eastern Washington, fully owned

Dual-track model:

- For-profit: Photogrammetry licensing, tactical simulation, real estate virtualization
- Nonprofit: Open-source civic infrastructure under review by Solana Foundation

Financials:

- Year 1: \$100K+ revenue
- Year 3: \$500K+ projection
- Assets: \$200K+ property, \$50K+ in equipment and IP

This is infrastructure - tested, lean, and designed to scale.
