

Witness Grid - Neutral Scan Ops Manifest

Entity Name (Working Title): Witness Grid

Tagline: Truth. Captured.

Mission Statement:

Witness Grid is a neutral, rapid-response spatial scanning unit that provides unbiased 360-degree photogrammetry and scene preservation at the moment of impact. We exist to protect the truth in environments where time, contamination, and mistrust erase evidence and blur accountability. We do not take sides. We document. We preserve. We make the invisible visible.

Purpose:

To arrive early, scan fast, and leave a secure digital trace of events as they were-not as they are rewritten. Whether responding to a crime scene, natural disaster, or high-conflict encounter, Witness Grid bridges the gap between institutional authority and public trust by delivering forensic-grade spatial data captured independently of police, media, or bystanders.

Core Capabilities:

- Mobile 360 degrees scanning with Matterport or equivalent rigs
- Secure digital timestamping and scene sealing
- On-site in minutes, off-site in moments
- Compatible with legal chain-of-custody standards
- Built for use in investigations, litigation, and public transparency

Operating Principles:

1. Neutrality - No affiliations. Just truth.
2. Speed - The first to see becomes the best to record.
3. Integrity - Secure capture, no modification, full transparency.
4. Access - Data can serve both prosecution and defense, media and family.
5. Preservation - Before it's lost, broken, or bulldozed-we scan it.

Future Expansion:

- AI-based scan analysis
- Integration with body-worn telemetry for multi-angle reenactment
- Disaster response overlays
- Citizen-submitted scan requests for historic or endangered structures

Witness Grid is not here to speculate. We exist to say, "This is what it was."
